

FREEZE FRAME UHD

Analyze. Enhance. Convert.

The StarWitness® FreezeFrame UHD software gives you the power to import, enhance, and convert any type of video. It is deployable to Windows-based desktops or laptops, no additional plug-ins or third-party software is required.

Powerful Video Processing
Software from StarWitness.

Motion Detection

No more scrolling through hours of video footage. Let FreezeFrame UHD software do the work for you.

Comprehensive

Efficiently work with any type of video including surveillance videos from CCTV systems, smartphones, covert cameras, including HD, 4K, and ultra HD, and videos captured from the Internet.

Courtroom Ready

Quickly convert files to interoperable formats for effortless presentation in court. Creates an evidence report for every exported result.

FREEZEFRAME UHD

Features and Benefits

Extensive

FreezeFrame UHD software capabilities range from file conversion and clarification of CCTV video to performing motion analysis on ultra high-definition surveillance video.

Automatically Bookmark All Motion

FreezeFrame UHD automatically detects segments of motion in any video and places a bookmark to quickly identify those areas.

Efficient and Flexible Workflow

FreezeFrame UHD software accepts multiple video file formats. Simply import the video to begin enhancing the image. When complete, export the file for sharing, archiving, etc.

Video Enhancement

On-screen clarification capabilities include the ability to deinterlace, adjust brightness and contrast, improve sharpness, stabilize video, frame average to reduce noise, zoom in, add a spotlight, and blot out faces.

Accredited

Accredited by primary local, state, and federal law enforcement agencies including ASCLD-certified facilities.

Specifications

Case Management	Back-up, archive, restore, search, case logging for all user actions, case notes.
Operating System	Windows 7, 8 or 10
