

FIELD INTERVIEWER

Flip. Press. Record.

"We have been able to video interviews at the hospital, where previously we were limited to audio only. Occasionally investigations take us out of our county, having the ability to use our own video recorder makes it so much more effective. No waiting for the other jurisdiction to burn us a copy from their system, which might involve proprietary software that we don't have and can't install on our network."

"We especially like the adjustable camera. No more stacking books or adjusting a tripod."

Sergeant Jennifer Sheahan-Lee
Skagit county Sheriff's Office

Simple

Start your interview recording with the push of a button.

Superior Audio

Captures voices up to 25 feet away and whispers from across the room.

Portable

Conduct interviews anywhere—at the scene, in your car, at the hospital, in a conference room, during a search warrant, in a dorm room, anywhere.

STARWITNESS[®]

FIELD INTERVIEWER

Features and Benefits

Recording

Twelve hours of interviews can be recorded on a removable SD card. Kit includes an external SD card for twelve additional hours of recording.

Non-Proprietary Software

Export your recordings to play on any computer using commonly available media players.

Enhanced Viewing

Removable, magnetic, wide-angle fisheye lens enlarges viewing area.

Tablet

The kit includes a smart tablet for previewing and monitoring your interviews, and a software package for playback, management, and burning DVDs of interview recordings.

Power

An internal battery provides four hours of recording time. An additional battery is included and extends recording time by 18 hours when fully charged.

Mount the Field Interviewer to a car's dashboard, attach it to a tripod, place it in the palm of your hand, or simply set it on a table; the StarWitness® Field Interviewer records interviews in any setting.
